

NEW FEATURES FOR THE EMERGENCY BANDAGE

The Emergency Bandage in its new compact packaging is the upgraded edition of the original, most effective bandage in use today. The Emergency Bandage introduces important new features with unique added advantages in a single, easy-to-use wound dressing.

Stop & Go

The wrapping leader is released in short lengths of elastic bandage with the natural wrapping movement of the hand thus preventing unraveling if dropped. The result is easier, quicker, more effective and more controlled bandaging.

Compact & Quiet

Maintaining the same sizes and dimensions for all versions of the Emergency Bandage, the new double vacuum packaging makes each bandage pack between 20%-50% smaller fitting into any pouch, pocket, pack or kit.

Offering Ideal Functionality on the Battlefield

The original Emergency Bandage with the new innovative features improves functionality in treating hemorrhage in emergency situations. Tactical integrity is maintained by eliminating any rustling or plastic bag noise when not in use and is also made to open without noise.

ABOUT FIRST CARE PRODUCTS

First Care Products develops and manufactures cutting edge first-response medical products designed to improve field hemorrhage control and to save lives. First Care Emergency Bandages are the 'Standard' in major military organizations, Police, SWAT, Fire Departments and EMS worldwide, including the US Department of Defense, US Department of Homeland Security, the Israel Defense Forces, NATO, Australian Defense Forces, Canadian Armed Forces, and many others.
